

Orthodontic Treatments in Birmingham

Resident Orthodontic Specialist

A genuine smile is infectious and can really boost your confidence and self-esteem. Our Selly Oak based orthodontic service can offer you a fantastic and naturally beautiful new smile. Our own resident Orthodontic Specialist is Dr G Fickert. Dr Fickert has been a practising Orthodontist for over 25 years. Our Orthodontic Therapist Miss K Rodgers, is also highly experienced. We offer a range of treatments options including fixed implements, invisible implements and removable implements for adults and children.

Dr Fickert has trained numerous dentists in the practice of Orthodontics, being one of the most experienced and highly qualified Orthodontists in Birmingham. Patients often comment on how pleased they are with their braces. It is a joy to assist people in feeling more confident. We hope you will choose to benefit from our Orthodontic service.

We offer three forms of orthodontic treatments. These are: traditional braces consisting of metal brackets and wires, Invisalign braces: which are the nearly invisible, or the Six Month Smile procedure, which are discrete, tooth coloured braces which can achieve an elegant, straight smile in as little as six months.

Six Months Smiles

Do you think braces look unsightly? Have you been put off by how long treatment can take? Midland Smile Centres are now offering a new Cosmetic Braces System called Six Months Smiles. Six Months Smiles can straighten teeth in as little as 6 months. The average treatment being between 4 to 9 months. Six Months Smiles braces are more discrete because they are tooth-coloured and therefore blend in naturally with your own teeth. This clear fixed braces system has been proven to offer great results quickly. The braces are comfortable, designed to move the teeth gently and discretely offering tooth-coloured brackets and wires to blend in with your own natural teeth.

The Six Month Smiles service is available at most Midlands Smile Centres dentists in Birmingham.

Invisible Braces

Invisalign Invisible Braces

Have you considered braces but don't like the way they look?

Midlands Smile Centres in Birmingham and Alcester now offer Invisalign's nearly invisible alternative to traditional braces. This is a modern hi-tech alternative which uses transparent removable 'aligners'. Invisalign is just as effective as traditional braces and nearly invisible so now you can have straighter teeth without braces.

The aligners are made specifically for your teeth by our experienced Orthodontists based on moulds taken of your teeth. The treatment plans involve a succession of slightly different aligners, each one bringing your teeth closer to your desired smile. Before you agree to the treatment you can see the plan in detail, using the Invisalign 3D modelling system.

Being nearly invisible is not the only advantage Invisalign aligners have over traditional braces; they are also removable which makes eating and cleaning considerably easier than other types of braces.

Why not come in and have a chat with one of our orthodontic specialists about whether Invisalign would work for you?

The Invisalign service is available at our Alcester and Selly Oak Midlands Smile Centres dentist in Birmingham.
